

For this section you are going to make the text fade in, from below and add a parallax to all the elements.

HEY! HO! HERE YOU GO

This is your test site

This is your page navigation

Ok, here's the deal...

For this section the text needs to fade in from the right and the images from the left.

[I AM A BUTTON](#)

HERE'S WHAT YOU'RE GONNA' DO

Let's move things!

When the cursor enters this section, all images need to make subtle movements that mimic the direction of the cursor.

Hover schmover...

I don't know, these blocks seem a bit static. Please add any hover function you think would fit in with the overall feel of the site on all 3 blocks. Also add a short rationale of your choice in the hover state.

Good luck and stuff, not that you need it (because you're awesome).

Please feel free to do extraordinary things and make this site as glam and fun as possible. We know it's a 'test' (blegh), but we seriously want you to have fun and show us what you've got :)
